Education

Indian Institute of Technology (BHU), Varanasi	2024 - 2028
<i>Bachelor of Technology in Electrical Engineering, 7.55 GPA</i>	<i>Varanasi</i>
ShantiNiketan Sen. Sec. School, Hoshangabad MP	2023
<i>CBSE 95.20%</i>	<i>Hoshangabad MP</i>
ShantiNiketan Sen. Sec. School, Hoshangabad MP	2021
<i>CBSE 88.20%</i>	<i>Hoshangabad MP</i>

Projects

AI-Powered Interview Preparation Platform <i>React, Node.js, Gemini API</i>	May 2026 - Jun 2026
- Built full-stack AI platform analyzing resumes/job descriptions for personalized interview roadmaps. - Integrated Gemini API for technical/behavioral questions, skill-gap analysis, and structured feedback. - Developed secure, responsive application using React, Node.js, and JWT authentication.	
XLPE Cable Aging Classification using Deep Learning <i>Python, TensorFlow</i>	Jan 2026 - Apr 2026
- Built deep learning pipeline for classifying cable aging using leakage current signals. - Converted signals to Recurrence Plot images; trained CNN, VGG16, ResNet50, AlexNet, DenseNet201, ConvNeXt models. - Achieved up to 98.12% accuracy; evaluated models with confusion matrix analysis. - Used t-SNE visualization for feature learning and class separation analysis.	
URL Shortener (Full Stack) <i>React, Node.js, Express, MongoDB</i>	Nov 2025 - Dec 2025
- Built full-stack URL shortener with React, Node.js, Express, MongoDB, and JWT authentication. - Implemented user-scoped dashboards with backend authorization and ownership checks. - Added support for custom short URLs with server-side validation. - Developed click analytics by tracking redirects in real time.	

Skills

Languages: C/C++ (Proficient), Python, Java, SQL (Familiar)

Core CS: Data Structures & Algorithms, OOP, Operating Systems

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, Cross-Validation, Regression, Classification

Deep Learning: TensorFlow, Keras, CNNs, Transfer Learning, Model Evaluation

Tools: Git, GitHub, Postman, VS Code

Achievements

- Solved 1000+ DSA and Competitive Programming problems across LeetCode, Codeforces, and CodeChef.
- Achieved Pupil (1265 peak) rating on CodeForces.
- Earned a 3 Star rating (1710 peak) on CodeChef.
- Achieved a 1681 contest rating at Leetcode.
- Ranked 2735th globally in Codeforces Round 1060.
- Ranked 76th in CodeChef Starters 217 competitive programming contest.

AI suggestions to review

Yellow marks only new suggested skills absent from your supplied profile. These are development suggestions, not claimed qualifications. Existing resume content is unchanged.

- Computer Networks** Learn fundamental networking protocols (TCP/IP, HTTP) and concepts (OSI model, routing, DNS).
- Cloud Technologies** Explore AWS or Azure services by deploying a project to a cloud platform.
- Debugging** Practice advanced debugging techniques using tools like GDB or IDE debuggers on complex applications.
- Unit Testing** Implement unit and integration tests for existing projects using frameworks like Jest or Pytest.
